

The Kanino

and other hiking trails on Endelave

All routes start from the information board at the harbour

THE KANINO approx. 21 km

This trail will take you on a beautiful round-trip of the island. You will experience the diverse nature of Endelave including coastline, beaches, forest, wetlands, and heath. Moreover, you will have plenty of opportunities to spot one of the many rabbits on Endelave.

Surface: Beach, stone, gravel

No cycling!

THE MINI-KANINO approx. 12 km

If 21 km is a bit too much for you, but you still enjoy longer walks, we recommend the Mini-Kanino. This trail takes you from Endelave village to the northern point of the island – and back. You will experience the beauty of the Danish heath in the natural area “Øverste Ende”.

Surface: Asphalt, gravel

Also for cyclists.

RED RABBIT ROUTE approx. 3 km

Short roundtrip at the village, Endelave By. The trail follows the coastline past the beach meadows and the bird sanctuary, ”Flasken”. Through the village, you will walk on Kongevejen and pass the inn, the school and the grocery store.

Surface: Asphalt, gravel

Also for cyclists.

FURTHER INFORMATION

kystlandet.com - The site to visit for information about experiences on Endelave in English

oenendelave.dk – The island’s own website with information concerning all your practical questions

endelaveif.dk – Get an overview of the many events organised on Endelave by the community, Aktiv Ø
